THE REPORTING RIFF
What Healthcare Executives Say About
Reporting Limitations

INSIDE THE REPORTING BOTTLENECK

84%
operate across 20+ systems causing silos and integration gaps

90%
report revenue loss due to inefficient data handling

90%
see a reduction in report generation time through integrated automation

STATIC VS. DYNAMIC
The Performance Divide

STATIC REPORTING

- ☒ Focused on past performance, not present operations
- ☒ Fixed templates and IT bottlenecks slow answers
- ☒ Encourages reactive decision-making
- ☒ Delays ROI and drains analytical bandwidth

DYNAMIC REPORTING

- ☑ Continuously updated with live, integrated data
- ☑ Self-service exploration replaces IT dependency
- ☑ Enables same-day decisions and early intervention
- ☑ Delivers measurable ROI with faster insight cycles

WHY TRADITIONAL BI FALLS SHORT

- Locked into retrospective dashboards that can't adapt midstream
- Dependent on IT for every query and report refresh
- Fragmented data creates conflicting versions of truth
- Slow refresh cycles leave leaders reacting instead of leading

HOW SALIENT HEALTH LEADS THE SHIFT

Salient Health helps healthcare organizations achieve true performance optimization.
More than BI dashboards, Salient Health fuses decades of industry expertise with a self-service analytics platform built for decision-makers.
